

SAMPLE SITE PLAN

INFORMATION YOU SHOULD SHOW ON YOUR SITE PLAN - Please LABEL all markings

- | | |
|---|--|
| 1 Location of surface water | 5 Three (3) relative elevations |
| 2 Proposed drainage patterns | <i>Ex: Road, Improvement site, Surface Water</i> |
| 3 Limits of Grading (excavated or disturbed area) | 6 Silt Fence, Tracking Mat, etc. |
| 4 Distance from disturbed area to surface water | 7 Excavated Soil Stockpile |

HOW 'YOU' CAN DETERMINE RELATIVE ELEVATIONS and apply them to your site plan (Number 5 above)

***Please Note:**
House elevations are not field verified by LCDC for Flood Protection.

- First** Stand at a known point relative to your property (either the road, the waterfront, or your building site).
Second Look at the other features on your property to determine the relative distance (i.e. above or below your eye level). This elevation difference is to be shown on your site plan.
